- Artificial intelligence and Machine learning using Python

About me

I am a student at Guru Nanak Institute of Technology (GNIT), currently pursuing my third year in **Computer Science and Engineering**. With a keen interest in technology and creativity, I have embarked on an exciting journey as both a **Game Developer** and **Frontend Web Developer**. My curiosity and dedication drive me to explore the dynamic world of game development, where I craft immersive experiences through code and design. Simultaneously, I delve into the realm of frontend web development, turning ideas into interactive and **user-friendly websites**. With a strong foundation in both fields, I am committed to continuous learning and growth, aspiring to contribute innovative solutions to the ever-evolving tech landscape.
